## **1. PhotoXChange**

An application for exchanging photos through the web. Simple as it may seem, this application aims to be the ultimate application for doing that. See [here](#).

## **2. Forrest Include Extension**

A simple extension to Forrest to allow inclusion of files into Xdoc documents. This allows both inclusion of Xdoc into Xdoc to allow you to split up your document into many smaller parts, making it more manageable, or for instance to include a code sample or configuration file into your Xdoc document.
